Browsers (e.g., Chrome, Firefox, Edge)

Devices (desktop, mobile, tablet)

Tools (if any), like:

Automation tools (Selenium, Cypress)

Performance tools (JMeter, LoadRunner)

Great — you've provided everything needed

Here's your **complete Test Plan** for the e-commerce web application:

📄 Test Plan – E-commerce Web Application

1. 🚀 Objective

The objective of this test plan is to ensure the **e-commerce web application** functions correctly, meets user expectations, and is secure, performant, and compatible across supported platforms.

2. 🌱 Scope of Testing

✅ In Scope

- User Registration & Login
- Product Search & Filters
- Cart & Checkout

❌ Out of Scope

- Third-party integrations not controlled by the system (if any)

+ Ask anything

Reply with your choices, and I'll move to the **final Question 5**

📄

👍

🗨

📄

🔄

...

Functional testing

UI/UX testing

Performance testing

Security testing

Compatibility testing (browser/device)

Regression testing

Perfect — that's a comprehensive set

🌱 Step 5 – Environment & Tools

Question 5 (Final):

What **testing environment and tools** do you plan to use?

👉 Please mention:

- Browsers (e.g., Chrome, Firefox, Edge)
- Devices (desktop, mobile, tablet)
- Tools (if any), like:
  - Automation tools (Selenium, Cypress)
  - Performance tools (JMeter, LoadRunner)

+ Ask anything

Out of Scope

- Third-party integrations not controlled by the system (if any)
- Admin panel (if not included)

3. 🛠 Modules to be Tested

- Authentication Module
  - User registration
  - Login/logout
  - Password reset
- Product Module
  - Search functionality
  - Filters and sorting
- Cart & Checkout Module
  - Add/remove items
  - Cart updates
  - Checkout flow

4. 🟢 Types of Testing

- Functional Testing
  - Validate all features work as expected
- UI/UX Testing
  - Ensure layout, design, and usability are user-friendly
- Performance Testing
  - Check response time and system behavior under load
- Security Testing

+ Ask anything

- Payment integration
- Order history

💡 You can list 4–6 modules that are important for your app.

Reply with your list, and I'll move to **Question 4** 🚀

📄 👍 🗨 📌 🔄 ⋮

User registration & login  
Product search & filters  
Cart & checkout

Great — solid core modules 👍

🌱 Step 4 – Testing Types

**Question 4:**  
What types of **testing** do you want to include in your test plan?

👉 Common options (you can pick a few):

- Functional testing
- UI/UX testing
- Performance testing
- Security testing
- Compatibility testing (browser/device)

+ Ask anything

📄 Critical defects fixed

• Test summary report completed

9. ⚠️ Risks & Mitigation

| Risk                    | Mitigation                              |
|-------------------------|-----------------------------------------|
| Incomplete requirements | Regular clarification with stakeholders |
| Environment issues      | Maintain stable test environment        |
| Time constraints        | Prioritize critical test cases          |

10. 🧑 Roles & Responsibilities

- **QA Tester** – Test execution, defect logging
- **QA Lead** – Test planning, review
- **Developers** – Bug fixing
- **Project Manager** – Coordination

✅ Summary

This test plan ensures that the e-commerce application is:

- Reliable
- User-friendly
- Secure

• Mozilla Firefox

• Microsoft Edge

📱 Devices

- Desktop
- Mobile
- Tablet

🔧 Tools

- **Automation Testing:** Selenium, Cypress
- **Performance Testing:** JMeter, LoadRunner

6. 📄 Test Data

- Valid and invalid user credentials
- Sample product catalog
- Different cart combinations (single/multiple items)
- Edge cases (empty cart, invalid inputs)

7. ✅ Test Deliverables

- Test Plan document
- Test cases
- Test execution report
- Defect reports

## Test Plan – E-commerce Web Application

### 1. Objective

Ensure the application functions correctly, is secure, performant, and user-friendly.

### 2. Scope

In Scope:

- User Registration & Login
- Product Search & Filters
- Cart & Checkout

### 3. Modules

Authentication, Product, Cart & Checkout

#### 4. Testing Types

Functional, UI/UX, Performance, Security, Compatibility, Regression

#### 5. Environment

Browsers: Chrome, Firefox, Edge

Devices: Desktop, Mobile, Tablet

Tools:

Automation: Selenium, Cypress

Performance: JMeter, LoadRunner

#### 6. Test Data

Valid/invalid users, product data, cart scenarios

#### 7. Deliverables

Test plan, test cases, reports, defects

#### 8. Entry/Exit Criteria

Entry: Requirements ready, environment setup

Exit: Tests executed, defects fixed

#### 9. Risks Requirement gaps, environment issues, time constraints

#### 10. Roles

QA Tester, QA Lead, Developers, Project Manager
